

Braided PTFE Tape**TA4030 Braided PTFE tape**

Braided from PTFE yarns into a tubular structure and then pressed and shaped into a tight flat joint sealant tape. The excellent surface conformability makes it ideal for vessel and pipe flanges with rough, uneven, or glass-lined surfaces. It can handle virtually any chemical services except molten alkali metals.

TA4030L Braided PTFE tape with lubricant

Braided from PTFE yarns which are treated with lubricant.

Applications:

Widely used for mixers, agitators, refiners, hatches, process vessels, and flange connections in petrochemical industry, chemical industry, water treatment industry, food and beverage industry, sugar industry, and so on.

Service Limits:

Temperature	-200°C~+260°C
Maximum Pressure	25bar
PH range	0~14

Normal Dimensions:

Thickness: 3~8mm;

Width: 20~80mm.
