

Glass Fiber Ladder Tape**TA6150 Glass fiber ladder tape**

Woven from texturized fiberglass yarns. The product offers superior insulating and heat resistant properties, withstanding high temperature in continuous service. It is resistant to many acids and alkalis, and most bleaches and solvents.

Applications:

Specially used in flange joints with bolts.

Specifications:

Maximum temperature: 450°C~550°C, depending on different types of glass fiber used.

Chemical incompatibilities: Hydrofluoric acid, hot phosphoric, acid and wet hydrogen chloride.

Normal Dimensions:

Thickness: 1.5~5.0mm;

Width: 20~300mm.

Normal Packing:

25m or 30m/roll, then 20kgs/woven bag.
