

Knitted Glass Fiber Rope**PA6140 Knitted glass fiber rope**

This elastic and flexible rope is knitted from texturized fiberglass yarns. The product offers superior insulating and heat resistant properties, withstanding high temperature in continuous service. It is resistant to many acids and alkalis, and most bleaches and solvents.

Applications:

It is a very flexible and easily compressible material mainly used in cast iron stove. Other applications include gasketing, caulking of oven and furnace doors, wood stoves and expansion joints.

Specifications:

Maximum temperature: 450°C~550°C, depending on different types of glass fiber used.

Chemical incompatibilities: Hydrofluoric acid, hot phosphoric, acid and wet hydrogen chloride.

Normal Dimensions:

5~30mm.

Normal Packing:

5kgs or 10kgs/roll, 20kgs/woven bag.
