

PTFE Thread Seal Tape**TA4800 PTFE thread seal tape**

PTFE thread seal tapes are very thin tapes made of 100% virgin PTFE. They are quick, convenient thread sealant used to wrap the threaded ends of pipes to improve the water or gas tightness. They are chemically inert, nonhardening, non-contaminating permanent seal able to withstand wide temperature range.

Specifications:

Density	0.25~1.20g/cm ³
Temperature	-180°C~+260°C
Tensile strength	≥7.0Mpa
Elongation at break	≥20%
PH range	0~14

Colors:

Tape: normally in white color. For high density tapes, yellow and pink colors are also available on request.
Plastic cover and spool: various colors according to customer's requirement.

Normal Dimensions:

Thickness: 0.075~0.2mm;

Width: 12~300mm;

Length: 5~50m.
